Association Overview/ History (Resumen/Historia de la Asociación):

The Commonwealth Veterinary Association (CVA) was founded in 1967 as one of the professional associations of the Commonwealth Foundation and is made up of national veterinary associations or approved bodies of Commonwealth countries, and also some non-Commonwealth countries. The CVA is divided into six geographical regions- Asian Region, Australasia/Oceania Region; Canada Caribbean region; East, Central and Southern African Region, West African Region, and the UK Mediterranean region. Regular Regional meetings are held in the above regions every two years and once in four years a Pan Commonwealth Veterinary Conference is held.

2017 List of Activities (Lista de Actividades en el 2017):

The technical activities of CVA cover a wide range and include the following:

1. Journal, Book and Audio Visual Programme
2. Projects
3. Training Programmes, Workshops and Seminars
4. Support for Veterinary Education
5. CVA Study Fund
6. Future Strategies
7. CVA Website
2017 Highlights (Eventos Destacados del 2017):

Our highlight this year was recognition of the CVA’s Golden Jubilee and fifty years of volunteering and contribution to make a difference. The Kenyan Veterinary Association was also celebrating fifty years of achievement and invited the CVA to combine with them for a joint scientific conference. This was held in Nairobi, Kenya, the last week of April. We took this opportunity to fund African Councillors, including from West Africa, to have a CVA African Regional Meeting. The program organisation included the opportunity for CVA members to join with the KVA to celebrate World Veterinary Day. There was a session on Small Animal Practice chaired by Dr. Olatunji Nasir from Nigeria. The keynote address entitled “Importance of CPD in small animal practice-Practice and Challenges in operating a sustainable practice” was delivered by Dr. Roy Aronson (South Africa). WSAVA was represented by its President Elect Dr. Shane Ryan who presented a paper on the activities of WSAVA.

Our Treasurer Dr. Deb Kirton (New Zealand), attended the Federation of Asian Small Animal Veterinary Associations (FASAVA) conference in August on the Gold Coast, Queensland, Australia. The four-day program provided cutting edge speakers and issues across 8 streams.

Other activities and contributions include the CVA providing funds to build a veterinary website for the Caribbean countries and continuation of our book program. This year we were able to also send a donated x-ray developer to Sokoine University of Agriculture in Tanzania. A donated anaesthetic machine was shipped to the Veterinary Teaching Hospital at the University of Peradeniya in Sri Lanka. We were also grateful to an Australian practitioner who donated veterinary instruments to The Gambia.

Our Past President, Abdul Rahman, attended the World Small Animal Veterinary Association meeting in Copenhagen, Denmark in the last week of September. The CVA became an Affiliate member of WSAVA in 2016 and this association will be an important alliance to meet the needs of CVA Members in relation to small animal matters. The next Pan Commonwealth Veterinary Conference which will be held in Bangalore, India in March 2019 will have an exclusive session on Small Animal Medicine and the CVA will be looking for collaborating with WSAVA in identifying speakers and active participation of WSAVA members.
